

PR 11

External rewinder Compa III 10X

The rewinder PR 11 is fixed with the printer and screwed with a direct connection. The regulation by the pendulum provides an even and tight winding.

For the processing of larger print orders it is possible to take up label rolls up to a diameter of 205 mm and rewind the labels independent of the printer.

Specifications

Label roll		Weight	5 kg
max. rewind diameter	205 mm	Connection values	
max. label width	120 mm	nominal voltage	24 VDC
Label winding	outside/inside	Operating conditions	
Max. rewind speed	300 mm/s	operating temperature	10 ... 35 °C by air humidity 30 ... 85 % not condensing
Rotating direction	switchable	storage and transport temperature	-20 ... 50 °C by air humidity 10 ... 85 % not condensing
Core diameter	40 mm on cardboard core 40 mm on winder axis 76 mm on cardboard core by adapter (included)	Item no.: 92.42.100	
Dimensions			
height x width x depth	280 x 260 x 270 mm
