

PR 16

External rewinder Compa III 162

The rewinder PR 15 is fixed with the printer and screwed with a direct connection. The regulation by the pendulum provides an even and tight winding.

For the processing of larger print orders it is possible to take up label rolls up to a diameter of 205 mm and rewind the labels independent of the printer.

Specifications

Label roll		Weight	3.5 kg
max. rewind diameter	205 mm	Connection values	
max. label width	180 mm	nominal voltage	24 VDC
Label winding	outside/inside	Operating conditions	
Rewind speed	max. 300 mm/s	operating temperature	10 ... 35 °C by air humidity 30 ... 85 % not condensing
Rotating direction	switchable	storage and transport temperature	-20 ... 50 °C by air humidity 10 ... 85 % not condensing
Core diameter	40 mm on cardboard core 40 mm on winder axis 76 mm on cardboard core by adapter (included)	Item no.:	92.42.200
Dimensions			
height x width x depth	280 x 320 x 270 mm
